Invitation:

Dear Friends.

It gives us an immerse pleasure and honour to invite you cordially on behalf of the management, college staff, the Department of Botany to participate ONE Day National Workshop on 'Plant Tissue Culture' organized by Shikshan Maharshi Dnyandeo Mohekar Mahavidyalaya, Kalamb, Dist. Osmanabad on 16th Feb. 2019

The Institution:

Dnyan Prasarak Mandal was established in the year 1951 by Late. S. M. Dnyandeo Bhaurao Mohekar (Mohekar Guruji). Dnyan Prasarak Mandal impart quality education from Primary to Post Graduate Level to pupils of this region especially the students from backward classes.

The College:

S. M. Dnyandeo Mohekar Mahavidyalaya is a multi-faculty college established in 1969 by Dnyan Prasarak Mandal, Yermala. The foundation stone of this college was laid down by Late Dnyandeo Mohekar Guruji. The college imparts quality education in all the three faculties with five post graduate departments and three research laboratories. The college is known for academic excellence, bearings it motto 'Dnyan Deep Lau Jagi'

ocation:

Kalamb is a Taluka place in District Osmanabad in Marathwada Region, situated on the bank of the River Manjra. It is well connected by road routs. It is on the State Highway 158, Barshi to Ambajogai, Kaij, Dhoki and Yermala are within 25 kms distance from Kalamb. The holy places Yermala (Yedeshwari), Ambajogai (Yogeshwari), Parli (Vaidyanath), Tuljapur (Tuljabhavani), Ter (Goroba Kaka) and Kunthalgiri (Jain Temple) are near to Kalamb.

Theme:

The goals of the workshop is to introduce teachers and students to some basic ideas, methods and tools of tissue culture techniques. some basic acquaintance with few tissue culture concepts, terms and techniques which would be of great help in understanding tissue culture for better research

Plant tissue culture is a practice used to propagate plants under sterile conditions, often to produce clones of a plant. Different techniques in plant tissue culture may offer advantages over traditional methods of propagation including—

- 1. The production of exact copies of plants that produce better flowers, fruits or have other desirable traits.
- 2. The production of multiple copies of plants in the absence of seeds or necessary pollinators to produce seeds and thus mature plants.
- 3. Regeneration of whole plants from plant cells.
- 4. Production of genetically modified plants.
- 5. Production of plants in sterile containers that allows them to be moved with reduced chances of transmitting diseases.

- 6. Production of plants from seeds that otherwise have very low chances of germination and growth.
- 7. Production of artificial seeds.
- 8. Production of haploid plants and thereby producing homozygous diploid plants.
- 9. To clean particular plant of viral and other infections and to quickly multiply these plants as 'cleaned stock' for horticulture and agriculture.
- 10. The workshop will include theory as well as hands-on lab exercises and demonstrations.

The workshop is designed to provide the same through theory sessions and lab exercises. Topics included in the workshop are Principles and applications of various facets of plant tissue culture, aseptic techniques, Basics of plant cells' requirements and media compositions, media preparations, sterilization techniques – glassware, media and plant sterilizations and observation of cultured cells.
